The main contest here is for mayor. With hardly an exception the nominees on either the republican or democratic tackets will be elected and until the last day or two the thought wis not mosted that any other man except one of those on the head of these two inches could be elected. But it now appears that there is a bare possibility that a main whom many people looked upon with knorn and who has been hissed in the streets may be elected—that is Dr. C. C. O'Donnell, in reality a self nonimated candidate, and afterward endorsed by different disaffected factions. This thought is strengthened by results gathered by the Ezaminer. This is a democratic paper but it is claimed that its reporters were matrucked to permit absolutely no bias to enter into their work. They were simply to ask every voter they met his choice for may or; and also for president. The Ezaminer's results are curious and startling On this basis the contest is almost entirely between Pond and O Donnell. Out of 857 voters who stated their intentions on the net yoralty contest, 317 will you for Fond democratic 343 for O Donnell and 163 for story republican. The sand lot orator draws has strength from both parties and from every class. AN ALARMING POSSIBILITY

from every class
Making all allowance for partisanchias, the
fact still remains that O Doinedi is a danger
ous factor among the candidates. His busi
ness is physician and surgeon, but it is well
ki cwn that most of his practice is from the
treatment of a peculiar class of cases.

SUMF PERTINENT QUESTIONS Fixing all the first into consideration a logal republican paper this afternoon editorially propounds the following questions it says 'His Dr O Donnell any totally propounds the following questions. It says. 'His 'Dr O'Donnell any known business capacity? Would any business bouse in Sine Francisco pit Dr O'Donnell in charge of its books ard business? Would any respectable man in San Francisco invite Dr O'Donnell to his Lause or permit him to be a social companion of his wife and daughter? Would the board of trade chamber of commerce and public offscials engaged in welcoming a distinguished visitor to San Francisco-Grover Cieveland for instance—like Dr O'Donnell as chairman of their committee? And would they like to explain his character and antecedents to the visitor they wished to honor? In selecting an expert to audit their books would are business firm choose Dr O'Dopnell? The mayor is auditor of all municipal accounts Would any man in San Francisco put his personal affairs in the hands of Dr O'Doanell for a joke, just to give him a chance?

REPUBLICAN RALLY AT CENTRALIA

Rev J R Thempson, of Vencouver, Speaks for John B Allen

ENYRALIA, W T, Nov 1.—There was a big republican unceting bere to-night. Rev J R Thompson of Vancouver addressed a large addence in Crosby's hall. After music by Binkine's band, the speaker was introduced by Mr Woods. He showed the difference between d kingly or despotic government and a nation where the people are their own governors and that by the use of the ballot every man is bound to do the best for his country. He went on to say this is a grand corporation transacting business for 60,000,000 people.

To make a perfect government we must educate the consciences of the rising generation and teach our youths the fear of God. Conscience must go with the ballot. Each country suppo es it has the best modus operand, but one thing is certain, a grand majestic future is before us. He then went on to speak of prolification showing that although a tool and noble party it is mistaken in its line of policy.

He next it nich do not be homesteed law as belonging to requisite in mistaken in its line of policy.

None whatever 'answered the expert.
From this time to the close of the session Mercer explained how Hutton got hundreds of thousands of dollar for interest which he charged Mrs Stewart. She was the possessor of a fortune of \$25 000,000, but from the moment she felt herself alone in the world her extraordinary interest is count began to drain her purse. On the very day Mrs Stewart died there is an entry showing that Hithour ordered in share in the bounces \$4 170 102 to be transferred on the books as cash.

What can you say, Mr. Crouch "interripted the reporter in reply to the complaints made against the Astoria line."
About all that can be said concerning this line is that it is run through about as good a route as could be chosen and is thoroughly looked after. The only other way the line could be r.in would have straight serves from I orest Grove, or some neighboring point and in such a case it would still be younged to the effects of storms the districts through which it would pass would be in places well night impassable, and the canner lies along the Columba would be left without means of telegraphic commouncation which the compaint of the party to be accorded them.
The company to my mind is doing all that can be expected of tin the matter of keeping this line in creder. THLY THREATEN SUIT

Fourth street is not improving very much under the niellowing influence of the gentle showers that are failing. In fruith it does not improve at all under the water cure treatment and the property owners are now threatening to commence suit against the city for damage. They claim the roadway would have answered for two years more but for the franchise granted the Portland & Vancouver railroad Company. This may be true but when the old planking was taken up to put the track down it was found to be rotten and many would not hold together with their own weight. It is claimed the planking would not have lasted more than this winter and then the street would have required improvement. The city recorder was instructed to give notice for the full improvement of the street and it would seem just and fair that the expense should be borne equally by the city and the property holders. It is unfortunite that action was not taken before the street was reduced to its pre cut deplotable condition.

So far the main work done in Alaska has been the developing of the 100-faithout him ind of course, in connection with this a great deal has been learned regarding the rechieses of the water so far as it provides food for fishes. The richest water has been found off Alaska where it swarms with shrining prawns, crabs marine worms, small holothurians, molitisks etc. The Oregon banks are also rich in similar fish food, but not to as great an extent as those of Alaska.

As far as can be determined the varieties of food fish are about equally divided between the Atlantic and Pacific coasts some kinds being common here which are unknown to our faistern cousins, while they enjoy some varieties which are never caught in our waters. No work has yet been done within 200 miles of San Francisco, and none will be for some time. The Albatross will probably remain in port for a month and will then pass the winter on the coast of Southern California, returning to Alaska in the epring of next year.

After leaving Alaska the Albatross come south skirting the shores of Washington teratory and Oregon Off this coast three banks were discovered—one sixty five miles off tipe Flattery one thirty miles west of Siculwater bay and the third sixty miles west of Point treatwiller the depth of water on these banks is running as high as 1239 futhoms. I from Cape Haftery to Gray's highor flounders and other slow moving tood his were taken with the traw! The bank off Point Greenvillers the most extensive of the three being twenty five long by eighten miles with with very shallow wifer the average depth being only forty two fathoras. Although the season was too late for successful lanibut-lishing along these banks some few leds were taken with trawlines, but the pre-sence of numerous deglish and sharks gave good reason for the absence of the infibut. In fishing here however the trawl lines cannot be left down ever night as they chief on the rocky bottom and become too weak to beer any great them. South of Cape Flattery black rod in I red rockish were taken but in smill numbers.

THE FACT OF REAL INTEREST.

Messrs. Bayard and Thurman are deliver-In speeches which they devote largely to the Sackville West affair. Both are shocked at the hideous turpitude of the act that drew the letter from Lord Sackville. Struggle as they may with their feelings, they are mable to find words to express their boiling in dignetion.

It is not yet ascertained who wrote the letter to the British minister. Nor is it a matter of much importance. Let the had-

Let it be admitted, however, that the letter was a political device, that it was written under an assumed character, with the intention of getting from his lordship an expression of his real sentiments, and of the sentiments of his countrymen, in regard to Mr. Cleve and and his party. Let it be called "a dirty trick," and all that kind of thing. What then 7 me pertinent fact is in the meaning of the Brittsh minister's reply. The exact meaning of Lord Sackville's letter is this, to writ: "The party now in power in the United States, as gain come up as a serious subject for settlement it is not likely that Lord Sackville ment it is not likely that Lord Sackville and the letter was a political would have been sent to America, for he did not bring to the United States a high reputation either for ability or character. This is the only thing that makes the Murchison-Sackville correspondence of the alightest interest to the country. This is the thing and only thing that causes Bayard and Thurman to take any interest in it. But for this fact they wouldn't care a great for the whole stair. It is the fact that publication of the British minister's letter, right on the eve of a fishional—election, identifies the Cleveland administration with British wishes and interests, that so shocks their moral

and interests, that so shocks their moral sense and gives them this inexpressible pain.

The spuriousness of the Murchison letter to not the thing that hurts them. The gouldness of the Sackville letter is the source of their anguish. There is the source of their anguish. There was a spurious letter some years ago that they delighted in. It is known to history as the Morey letter. For that forgery Messrs. Bayard and Thurman had no haid words. They thought it a mighty fine thing, chuckled over it, helped to spread and commend it to the attention of the country, and were not shocked in the least degree by the turplitude of the forgery and falsehood. Callous then by an actual forgery, these gentlemen are sensitive now to the "infamy" of a bit of strategy that drew out from a British friend of the administration and of their party and acquisition of the real sentiments of himself and countrymen—sensitive to it because they fear that publication of this genuine letter will turn votes away from their party.

NOT AT HOME TO SACKVILLE. Lord Sackville West has been informed by Secretary Bayard that the president and the secretary of state are no longer "at home" when he makes an official call. The New York Evening Post (Cleveland organ) confesses that while Backville has placed himself technically in the wrong, his action "would never have given the least trouble or unensiness if there had been no Irish vote at stake." In other words, the Fost addrawn by loopmotive "Free Trade," which mits that flackwille's ain would have been arising to passengers by reason of collisions with the Protection & Progress Railroad. WESTERN WINES.

It is announced that a discovery has been made whereby new wine may be given "age" within a very few days. The process is called "electrification." Duration of the process has control of the condition in which the wine last to the condition in which electric current. By this it is meant to convey the explanation that to give wine age, greater aga is not acquired by a greater length of time in the application of electricity. If the electrification is kept up too long it will produce undesired results, and before these undesired results are reached, there are intervening periods at which the wine bas attained different stages of age, bouquet and clearness. To generalize, the "aging" is caused by the climination of alcohol, the precipitation of albugineous matter and the superinduction of secondary alterations and fermentations through the action of electricity. Some interesting experiments of the kind suggested are detailed in the last annual report of the chief viticultural officer

It has lately been explained by a wine expert, that Solomon when he gave his advice. 'Look not upon the wine when it is red,' meant to say as much as. 'Use not wine when it is new.' it having been proven that the wines of bolomon's day were red when they were new, as many wines of this day sire, and these wines when they become aged lose their flery redness and become

tawney in color. An editorial in the San Francisco Call of last Sunday, suggests that there is a great fortune awaiting the men who, possessing the means, will provide themselves with extensive cellarage in the wine growing districts and fill it with carefully selected young wine which shall be kept until it has acquired proper age. The writer of the article had doubtless overlooked what is being add and written about the magnetic process. said and written about the magnetic process of "aging" the subtile blood of the grape. He goes on to show, however, that the trouble with the wine business in California and the same thing applies to Orgon—is that it has never been established on a business basis. Much of the wine which is produced on this coset is made by the crudest processes and then bundled without care as mpression.

The Chinese exclusion bill was passed by a republican senate, and the president in vain tried to get the senate to reconsider it; so there does not appear to be any great glory coming to Cieveland in this matter. Mr. Irish thinks that California, with over 8,000,000 of sheep, will vote for free wood, but then Mr. Irish thought that Oregon, with less than 3,000,000 of sheep, would vote for free wood, but the was mistaken. vested in the bisiness.

The coast ships to the markets of the world, by sen and overland, what the casual observer would be led to think is now a wast quantity of wines, the export reaching last year somewhere in the neighborhood of eight million gallons, but this is nothing to what the export should be. Unfortunately, for reasons given herein, for the reputation of Pacific coast wines, it would be much better were the export far less, until the character of the wine is bettered, or, at least, until the article is hindered of adulteration.

Aside from the commercial advantages to accrue to the coast in the production of good wine and plenty of it, there are moral and social advantages to be achieved. The people of wine-growing countries are always freer from drunkenness and its baleful rethus they are healthier, happier and more genial. Wine is used at the table only, except on extra occasions, and then it is used in very limited quantities, and more for ceremony than as a heverage. The people the right way, not only as to quantity and the right way, not only as to quantity and the scapon in which they are used, but in matter of preparation. Champagnes and clarets are cooled in the bottles instead of being ruined by ice in the glasses, and fortified whee are served at the higher temperature which reason would succest; while none are killed by the manipulations of men who know nothing of the proper use of such articles beyond a dexterity in handling tunblers, serving moles, simil or great, and making change at public lare.

Ben King, on trial for the robbery of the

knowledge of the fobbery, and yet testifies that he received and accepted \$20 of the spoil. We quote:

When Anderson returned to the office I was taking a usp on the cet. He threw me \$20, saying "There's \$20 for you." I put it in my pecket and fell asleep, and thought no more about it. I do not know why he gave me the money. Anderson made no proposition to me to steal the money, and I had no understanding with nim to make away with it and divide. away with it and divide.

man may be a very great feel without being a knave, but in this world no man is given and accepts \$20 without knowing why he is given it. King is neither an idiat nor an inabecile, and he knows why he was given that \$20, and Judge Tuttle told why King was given the money when he said:

King tostified that on the night the package was stolen he made two trips to the Northern Pacific stoles he made two trips to the Northera Pacific train; that before the second trip Anderson showed him the \$10,000 package, and saying, "Let's nip this," threw it against the wall among a pile of freight. King then drow so the train, and lastly to the Astoris boat, and when hereturned to the office Anderson gave him \$20 hush

King is evidently a very silly knave or he would not awear that he took \$20 without knowing what he took it for.

260,000. Harrison's vote is estimated at 105,000. The prohibition and labor vote will reach at least 5000, as it was 4530 in 1884 This would give Cleveland in New York city a majority over Harrison of 45,000. Kings dounty gave Cleveland in 1884 a majority over Blaine of 15,729. The republicans expect to reduce this to 12 000 this year, but we will assume that the democratic ma-jority in Kings county reaches 19,00. We will assume that in each of the counties of Queens and Richmond Cleveland's majority estimate of the not republican majorities outside of the counties we have named is 75,000. It will be seen that with a difference of only 10,000 in these estimates the result in the state of New York is so close that both

"An Inquire:" asks The Obrooman to tell him whether Senstor Sherman said recently that the republicans could not carry Indi ana. The Oregonian doesn't know whether Senator Sherman said it or not. A state-ment came by telegraph to the effect that he had expressed this opinion. But telegraphic statements are not always correct. No demanticonents are not siways correct. No democrat, for example, and perhaps no republican, credits the telegraphic statement published some days ago to the effect that Gov. Hill, when in Indiana, said he would carry New York, but would bet \$1000 to \$500 that Cleveland would not. Engerness to get news sometimes prevents telegraphic re-porters from silting the matter that comes to

Democratic speakers are finding it very unconfortable making speeches in Washing-ion territory. A dispatch from Colfax says that one Griffiths, a Spokane orator for the democrats, met with a cheerless reception, and similar events are reported from else-where in the territory, while the republican mealing are ratus enthyricating. The foot is meetings are very enthusiastic. The fact is that Washington is thoroughly disgusted with the manner in which she has been treated by the democratic administration, and, naturally enough, is not disposed to give the democracy, national or local, aid, comfort or countenance. All of which will eventuate to the great advantage of the terri-

Salem is to have a system of street rullways, and a line is to be constructed in time for the next session of the legislature. This is another gratifying evidence of the growth of the capital. All such enterprises will increase its vigor and bring other enterprises, and will enhance the value of real estate.

Postmaster Roby says the railway mail clerks were not dismissed, because they were Grand Army men. Perhaps they were dis-missed because they refused to contribute to the democratic campaign fund.

The problithon vote is the one weak and uncertain point. It is as difficult to depen a and estimate here as in Minnesota. It was 25.000 in 1894 and 40.00 in 1897. If it is not greater than it was last year good judges believe that the natural increase of the total and the certain relative increase of Harrison's vole will carry him beyord the reach of any possible danger from this quarter. But republicans hope that the probint into vote will not reach the figures of last year. If there ever were a time when the prohibitionst might be expected to abuse the fervor of his divinely virtuous madness this is it. The high character of the republican earlies and governor, the affiliation of the latter with the religious seed whose fervor inspires so many probibitions with a finer real the high iteense record of the republican legist iture ought to keep republican problibitionists in the party rakes and the identification of Hill with the videou element revealed in Lis whole public cirect the certainty that the highor interest will ruit the state if he is elected and the reciliously close probability that he will be reciliously close probability that he will be relicted in spite of Octavi and's defeat ought to bring, back to the republican part many problitionists rarely scratches or split has tack at and Harrison will probabily get the votes of all who come back for Milier's sake as Miller will lose those who yote for Fish. I am in iteating the hopes of republic my but it is to contain the problitions may suffer from the increase of the problition your last from the increase of the problition your last from the compared with it fereind was never popular in hea York, and he is less so now that ever If he gets anything near the party vote in 1881 will be a begatelle compared with it fereind was never popular in hea York, and he is less so now that ever If he gets anything near the party vote in New York and he is less so now that ever If he signal to his devoted and entimassite followers. temutically and on a large scale, unless there is a pane or suspi ion of trouchery. Then Cleveland might find himself under an avainache.

Taking only the probable into account and omitting any allowances for the merely possible though entirely reasonable. I think it convervative to place Cleveland's majority in New York at a little more than 50 000. This gives him his vote of 1884 with a due share of the natural increase. Certain in fluences have been at work in Brooklyn which is neore susceptible to change than New York, and Is rither sensitive to the economic arguments which play so large a part in this campaign, that justify the belief that the majority there will not be more than in 1884 or about 15 000. Allow two or three more thousand for Queens buffolk and Rich mond counties, and the cr. Harlem majority for tleveland still falls under 70 000. I be have this estimate to be as generous as that which gave Hurrison 85 000 allow and that he will have 15 000. majority in the state—always barring a waterspeat of promitition votes. I hope it may be more for Warner Miller's sake, because I dont see now he is going to get within 15 000 votes more than Cleveland good judges of the cutlook credit him with in New York and B ooklyn and if the preceding calculations are correct. Miller will must doleat after as gallant unally and creditable a fig.16 as was ever made for office in this state. He has respect pluty of honor and glory from the contest already. What It Led To is Told by President Buchanan's First Annani Message
I rom President Buchan in a message to congress December 8 1857 Since the ad journment of the last congress our constituents have enjoyed an unusual degree of health. The earth has yielded her fruits abundantly and has bountfully rewarded the toll of the husbandran. Our great stayles have commanded high prices and, up till within a brief period our manufacturing mineral and mechanical occupations have largely partaken of the general prosperity. We have possessed all the elements of material wealth in rich abundance and yet not try in its monetary interests as at the protection of the midst of unsurpassed plenty in all the productions and in all the encounts of informational wealth we fine, our minufactures suspended our public vorks retarded our public vorks retarded our private enterprises of inferent kinds abit doned and thousands of useful laborers thrown out of employment and reduced to want. The revence of the government which is chelly drived from dailes on im jorts from abroad has been greatly reduced while the appropriations made by congress it its last session for the current fiscal year are large in amount.

man and especially by the talk concerning the Mills bill and whish it will do for work inginen. She continues: I said we don't know anything about polities but some of is have a good memory yes. I can remember as far back, let's see yes as far back as 1840. I think at that time Taylor held the highest office. [This was in the time of the low tariff which the free traders say was such a blessing to the country.—Faitor.] I know that we could buy, a barrel of fle ir for \$3 good fine winter wheat and I do know too that it took a man a month to live and save that much. I don't know was it free trade or tariff. I being a woman don't know any thing about that but I do know that my husband vorked during the summer for 50 and 70c a day. In winter he walked five miles to chop condwood for 30c and 50c a cord. Well we hear people say everything was cheaper, yes what we had to sell such as butter and eggs, but what we'h d to buy was no cheaper. Coffee 18c and 3c a found I rints were then 124c a ward cight yards would make a dress good enough for any woman to wear to church. In short the

Burglary—Masting Deferred

A Lively Rough and Tumble —Information has reached here of a bloody ight between Sam A. Miles of St. Helens at old and well known citizen of Columbia county and a man named Charles Johns. The chromounter between these two men occurred Wednesday Nettier knives nor passols were used on either side but here seems lo have-been considerable gore quiled Johns was employed as a measurer in Muckle a lumber half. Between him and Miles it is claimed bad blood had existed for some time. Wadned y Miles and down to this wharf where Johns was at work. The men were soon engaged in a fierce quarrel that speedily cuttimated in blows. But little fistic science was displayed or either side but there was no fack of deadily earnestines. Johns promptly knocked Miles down when the latter rose and picking up a small perce of sawed timber strack his antagonist over the he d. The stick broke short off and one of the sharp ends cut a bad gash shove one of Johns seyes. Miles then strick Johns with a short end of the piece of which he retained a hold over one of his arms. Both men then cluiched Johns who as a very long and bushy beard which Miles graspe I with a vise-like clutch. Johns who as a very long and bushy beard which Miles graspe, I with a vise-like clutch. Johns who as a very long and bushy beard which Miles graspe, I with a vise-like clutch. Johns who as a very powerful man when the lion of his riture is fully aroused drew thock and dealt Miles in terrific right ha iden his I tinking direct and immediate off ct on Miles a rose mearly laying that nas if rotuber here that an own his fuc. The sina I ing blow knockel Miles clear over a pile of lumber. He carried with laim a handful of Johns s beard. Johns followed up the advantage and proceeded to give Miles at most fearful thumping about the head and face Miles it is said was so badly used up that he has been in bed since the row and will probably be laid up for some days. He is how uncer the doctor scare uppatiently nursing his bruites.

A DEFUNCT CHILAMAN — A dead Chinaman ras yesterday marning found in a room in was yesterday morning found in a room in the second story of a building on the west aide of Second street between Ash and Stark The body was found to be in a rather unsavory condition and from appearanres the man must have died severai days ago On inquiry it was learned that the Chinaman had come to the city severai weeks age from some smail town out in the country. He was sick, in rather straightened circum stances and not having any friends among the Chinese denizons in this city, the unoc cupied room in which he was found was given him. Not being seen around among the other Chinamen a search was instituted and the body discovered as stated. From appearances it seems very probable that the man field from a complication of starvation and neglect. His name could not be learned but his company was said to be the Wahing. The remains were taken charge of by the joss house and will be burned this afternoon.

Lie remains were taken charge of by the joss house and will be burned this afternoon. Nothing Bett Lieuwierer.—Occasionally harrowing accounts of the sufferings of the survivors of shipwreeks are published and it makes ones blood run could to hear of people out for days in an open boat with coly two crackers and a bucket of water to a man and as the days pass by and no friendly sail comes in sight the rations are reduced to one cracker and two buckets of water and at last lots are drawn to decide as to which of the party is in the best condition etc. But all these stores pade into in significance compared to the sufferings of Capt. Stott and the crew of the steamer Rowens who got aground on Lake tiver lastly while after a ratiofful ag. They were lastly while after a ratiofful ag. They were last in the mud for four days with nothing to eat but Limburger cheese. What their sufferings were no pen can describe and it will be weeke perhaps before their olfactory nerves have recovered from the effects of so long inhaining continuously the dreadful odor of that Limburger.

OBCANIZED SOCIETY OF CHARITY—At a regular meeting of the Young People's Society of Christian Endeavor of the First Con ety of Christian Endeavor of the First Congressional church held Mondin evening last steps were taken looking to the formation of an organized society of charity in this city. A committee of live members was appointed to act in the matter and a resolution passed requesting all such societies in Portland and suburb to popont like committees to attend a meeting to be held at the Congregational church. Priday evening the 9th inst. The ministers of the different churches are all o requested to be present and assist ar also all persons in accessed in the work. Nearly all Eastern cities have such organizations and one is said needed in Portland to provide for the worthy poor and expose the undeserving.

I h Houses at Rood River.—The Portand Natural Ise Con pany have just completed their new see house at Hood river with four divisions and a capacity of 7500 tons. This nee house is on the line of the C. R. & h. with a wilch for the sole accommodation of the rew company. The banding is ready for the reception of the product of Hood river the winter. An elevator is now on the way from the Last and when in pear too will be capable of receiving 1900 tons of ice daily. The Cocalalia lake he houses will be continued by this ice company, but the product will be shipped to ne ghboring towns except in case of shortage from Hood river. The combination storage of this company which includes Cocalella. Hood river and Albina will be £2.000 tons.

Concent —The members of the Y M C A are making preparation for a grand concent to be held in their rooms on the night of Wednesday November 7 At the conclusion of the concent the organization of classes for the educational work of the association will be perfected Gymna shim classes will be formed on the same evening and it is thought that the instructor will then be able to take up class training

BROKE HIS ARM -Mr Fred T Merrili inancial secretary of the Painters I mon who has been painting patent medicine signs who has been painting patent medicine signs on fences and blank walls for some time past was thrown from his wagon while crossing the street car track on Fifteenth street to the treet car track on Fifteenth street between K and I. on Wednesday and his arm was broken between the wrist and elbow. He says the guard of the switch at this point flow up and caught in the hind adde of the wagon stopping it suddenly and throwing him and Mr. myth out over the side. Mr. Mgrill is a standy industrous young man and in no way to blame for his misfortune but it seems as if there should be a retributive justice for those who cause jatent ined cines to be spread on every available space.

A Segious Accident -Mr James Ter A SERIOTS ACCIDENT—Mr. I times Ter williger met with a serious accident on Monday last. He was out to his place south of the city and on starting to come to town he was attacked with dizz ness and fell from the porch of his house, breakin, his arm and dislocating his shoulder. He was all our jured internally. His daughter Mrs. I. M. Richardson took a curriage and plysician out and after his injuries were attended to brought him in to her residence. MARIAN Brown Chiese Wite to The seems to be some invested and people wishing to become citiz as as the number of marriage licenses issued and the number of intentions thed keep about even Yester day licenses were issued to sux-couples who desire to enter the fragile bonds of matrimony and five persons declared their intentions of becoming citizens. In the various courts it persons were admitted to citizen ship. They were English German based Italian and Austrian but not in Irishman in the lot. It is hinted that some kind of a political club is paying for the naturalization of all these yoters.

Doing a Good Work—The German Immigration Society which has room a at No 25 Stark street is doing good service to immigrants coming here. It has procured employment for a number and has directed others where they can purchase land. The society has during the past month sant out 10 000 circulars on which over \$100 postage was paid. This work used to be done by the German Aid Society, but in connection with the other duties it was too much for the society. So the Immigration society wis organized to attend to this branch and it will be of great benefit to German speaking people coming here. Doing a Good Work -The German Inc

HAVEN T KETT PACE—There is no end of kicking among shippers concerning the impossibility of obtaining cars from the various railroad companies. There is a great demand for lumber and shingles to go Last but ours cannot be had. Wheat shippers cannot get cars either. I have had orders in for ten cars for two weeks said one man yesterday and have only been able to get two cars. It seems that to twithstanding the number of roads centering here they have not kept pace in transportation facifities with the increase of business. We sailly need a few more railrouds or a whole let more cars. HAVEN T KEPT PACE -There is no end of

GOING OUT OF BUSINESS -The old and Going Out or Business—The old and and well known firm of Mellis & Co is retiring from business. The store will be kept closed to-day and to motrow morning the doors will be thrown open for the last rush. There is no use in saying anything about prices. Everything including the fixtures must be sold by the list of Linuary. Hats will be trimned for nothing during that time and every possible independent will be made to close out the stock. Parties wishing to go into business will do well to call as there are enough fixtures and stock to fill a dozin indirecy stores.

NEW INMIGENTION ROOMS -The new rooms New Indicestion Rooms—The new rooms of the board of immigration on the south west corner of First and Ash streets are fast being put in order—I ur the past few days workingmen have been engaged in putting up shelving for the reception of the exhibits and vesterdry aftermon Secretary Struble and his assistant legan the first work in arranging them. It will yet be asternid days before the larger deep in the property of the property arranged and put into permanent place.

ONLY A QUEST ON OF GROWTH—If Port and sprowth for the next two years equils a like period of the past—and everything bespeals such a state—the kets in I alton Park now Long sold for \$100 will command \$1000 each just as readily as a \$20 gold piece will sell for twenty silver dollars. Just think of a beautiful building lot all cleared level within eight minutes rude of the city and carrying with it for the small sum of \$400 one chance in ten of securing a modern domain dwelling worth from \$1500 to \$5000.

Overloading a Tran.—A case of unnocersary cruelly to animals was witnessed by a repotter yesterday afternoon that might well be brought to the attention of the society of prevention of cruelly to animals. A main driving a dray loaded with boxes of applies, from the wharf at the foot of Ash street land sound difficulty in making the overloaded horses pull up the slippery planking. The load was very heavy and the rain had made the planking so slippery that it was next to trapossible for the horses to retain a footing. The horses atthough repeatedly pulled back by the heavy load were lashed and prodded until the street above was gained. There is no need of so overloading a team on a rainy day that the horses must strate overv finer of their muscles until their entire bodies are in a quiver.
